Attention Business/Financial Editors:
Azure Dynamics reports results for the first quarter ended
September 30, 2002

VANCOUVER, Nov. 29 /CNW/ - Azure Dynamics Corporation (TSX Venture - AZD) a leading developer of hybrid electric systems for commercial vehicles has announced its results for the first quarter of fiscal 2003.

During the quarter the Company's development activities were focused on building a second generation hybrid electric prototype delivery van which was used in service trials by Purolator Courier Ltd. ("Purolator") in October 2002, the successful demonstration of an all-electric powertrain in a delivery vehicle application in England, and preliminary work with London Taxis International ("Lti") regarding advanced hybrid electric powered taxis.

Chairman and CEO, D. Campbell Deacon, commented, "As a result of our efforts on all fronts by our entire team we have recently announced a Memorandum of Understanding with Purolator Courier for the supply of up to 3,000 hybrid electric powertrains for delivery vehicles and a Memorandum of Understanding with Lti for a joint program to develop and produce hybrid electric taxis with projected volumes of up to 3,000 vehicles per annum. These developments are significant, not only to our Company, but our industry as a whole." He added, "We also raised \$750,000 of financing in November 2002 from new and existing shareholders; we thank them for their support."

As the Company is engaged in the development of its core technologies, it mainly expends monies on research and development activities and on the management and infrastructure required to develop and commercialize its products. For the three months ended September 30, 2002, the Company incurred a net loss of \$1,073,532 or \$0.02 per share compared to a net loss for the same quarter of the preceding fiscal year of \$1,148,743 or \$0.05 per share. The Company incurred higher costs in the current quarter compared to the prior year quarter, particularly research and development costs and selling-related costs, yet the overall loss was lower due to \$161,347 of government contributions in the current quarter compared to \$29,775 in the prior year quarter.

Azure Dynamics Corporation is an innovative company that has developed proprietary hybrid electric vehicle technology for retrofit and new vehicle powertrains in the light and medium duty commercial category. Azure's intellectual property combined with interchangeable, off-the-shelf components provides an affordable and effective solution for fleet managers in applications such as the postal and courier delivery fleets.

Azure's series hybrid vehicle technology is also a gateway to fuel cells becoming practical, both economically and operationally. A series hybrid system (battery plus fuel cell) enables a reduction in the size of the required fuel stack and also allows much simpler power electronics thereby lowering the cost of the total fuel cell system and also simplifying many application issues.

Note: The foregoing information may contain forward-looking statements which involve known and unknown risks, uncertainties and other factors which may cause the actual results to be materially different from any future results, performance or achievements expressed or implied by such statements. Such factors include, but are not limited to: the ability to raise the capital required for product development and operations, product development delays, changing environmental regulations, the ability to attract and retain business partners, competition from other developers of hybrid electric vehicle control systems, competition from other advanced or existing power technologies, evolving markets for power for transportation vehicles. These factors should be considered carefully and readers should not place undue reliance on Azure's forward-looking statements. Investors are encouraged to review the risks detailed from time to time in the company's filings with regulatory authorities.

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
