

our drive can make your difference

Series Hybrid Electric

Azure CitiBus™

Azure Dynamics (AZD) develops hybrid electric and electric drive technology for commercial trucks and shuttle buses. AZD has developed a commercially available series hybrid electric CitiBus™ for paratransit and shuttle bus customers. The CitiBus™ is the clean, fuel efficient alternative to conventional shuttle buses.

The CitiBus™ is an environmentally responsible solution that will reduce fuel consumption and harmful emissions. The engine operation is optimized, and regardless of whether it is on or off, the hybrid system satisfies all of the buses operational power needs. Driver and passenger safety and comfort is therefore assured. And more, as the bus operation is extremely quiet thereby providing an improved environment for people inside and outside the bus.

Series Hybrid Electric Azure CitiBus™

Series Hybrid Vehicles

The CitiBus™ uses the Senator HD bus body manufactured by StarTrans, a member of Supreme Bus Corporation. StarTrans provides a complete line of standard and custom body options enabling you to acquire a bus that is best suited to your business needs. The bus foundation is a Workhorse W42 16,000 lb GVW long-life chassis hybridized by AZD.

The CitiBus™ has completed the Altoona 200,000 mile, seven-year test and meets the requirements for the Buy-America and FTA funding programs.

What advantages does an AZD Hybrid Electric CitiBus™ provide you?

- Engine-off at idle
- Regenerative braking
- Up to 40% fuel economy improvement depending on duty cycle
- Up to 30% reduction in greenhouse gas emissions
- Up to 30% reduction in vehicle maintenance

With fuel and operational savings, anti-idle and engine-off features, while still supporting functional operating power loads, this bus is a must-have for those fleets looking to reduce their environmental footprint. Work with AZD on a quote today.
